

OAuth 2 - Quickbook Connector User Manual

Base URL pattern :

If using Sandbox: <https://sandbox-quickbooks.api.intuit.com/v3/company/>

If using Production: <https://your-production-url.com/v3/company/>

1. Create a New Sandbox : Click on **Create** button.

2. Enter the details Name, URL (Sandbox base URL), Consumer key and Consumer secret key, select the version (v2) and select the Scope. Add the Redirect URI given in Quickbook. **Save** the record.

Note : Redirect URI should contain “/web/callback” after the ip address. So your Redirect URI should look like : ***https://localhost:8069/web/callback***

Save Discard

OAuth2 Authorization Test Connection Refresh Token

Name: **Sandbox India**

Configuration

Uri: <https://sandbox-quickbooks.api.intuit.com/v3/company/>

Consumer key: [O0GEptK8exgFiz29gVQ6beTA5yLEq4Ulj2NIOCrveElwpY0XZL](#)

Consumer Secret: [CxYXYdJHD72ev5AIfC830I4VINMLJuab95bswRm](#)

OAuth Type: OAuth2

Version: V2

Company Id: Ream ID

Go to link: Go to the whole url after Authorization

Authorized Uri: Enter the whole url after Authorization

Redirect URI: <https://localhost:8069/web/callback>

Authorization Base URL: <https://appcenter.intuit.com/connect/oauth2>

Token URL: <https://oauth.platform.intuit.com/oauth2/v1/tokens/bearer>

Scope: Accounting

Note : Redirect URI should contain "/web/callback" after the ip address.

So your Redirect URI should look like : <https://localhost:8069/web/callback>

- Click on **OAuth2 Authorization** button to authorize it.

Backend / Sandbox India

Edit Create Action

OAuth2 Authorization Test Connection Refresh Token

Name: **Sandbox India**

Configuration

Uri: <https://sandbox-quickbooks.api.intuit.com/v3/company/>

Consumer key: [O0GEptK8exgFiz29gVQ6beTA5yLEq4Ulj2NIOCrveElwpY0XZL](#)

Consumer Secret: [CxYXYdJHD72ev5AIfC830I4VINMLJuab95bswRm](#)

OAuth Type: OAuth2

Version: V2

Company Id: Ream ID

Go to link: https://appcenter.intuit.com/connect/oauth2?response_type=code&client_id=O0GEptK8exgFiz29gVQ6b...

Authorized Uri: Enter the whole url after Authorization

Redirect URI: <https://www.getpostman.com/oauth2/callback>

Authorization Base URL: <https://appcenter.intuit.com/connect/oauth2>

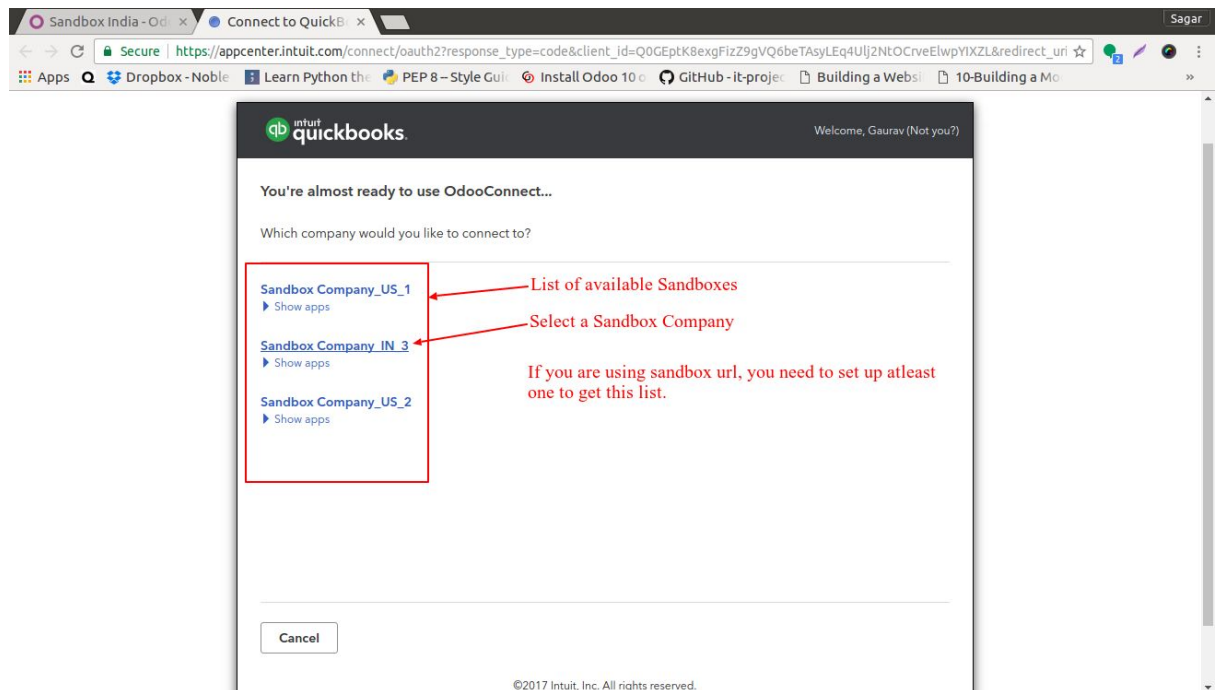

Token URL: <https://oauth.platform.intuit.com/oauth2/v1/tokens/bearer>

Scope: Accounting

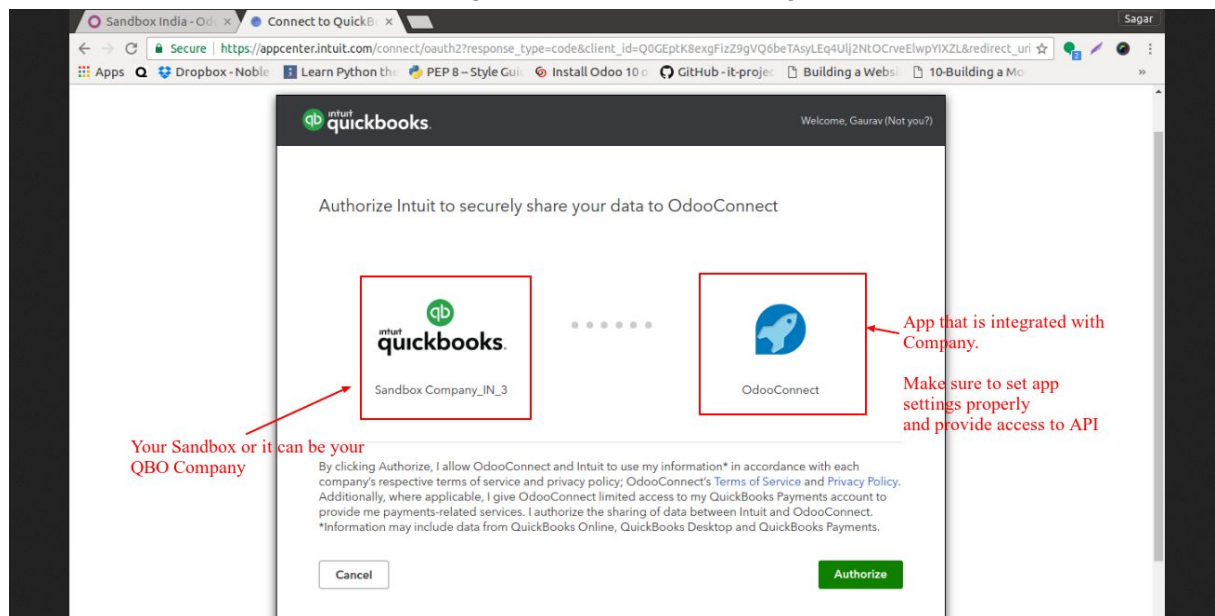

Go to Link will appear here automatically Click on link and Authorize

Go to link will get displayed automatically. Click on goto link to proceed with authorization.

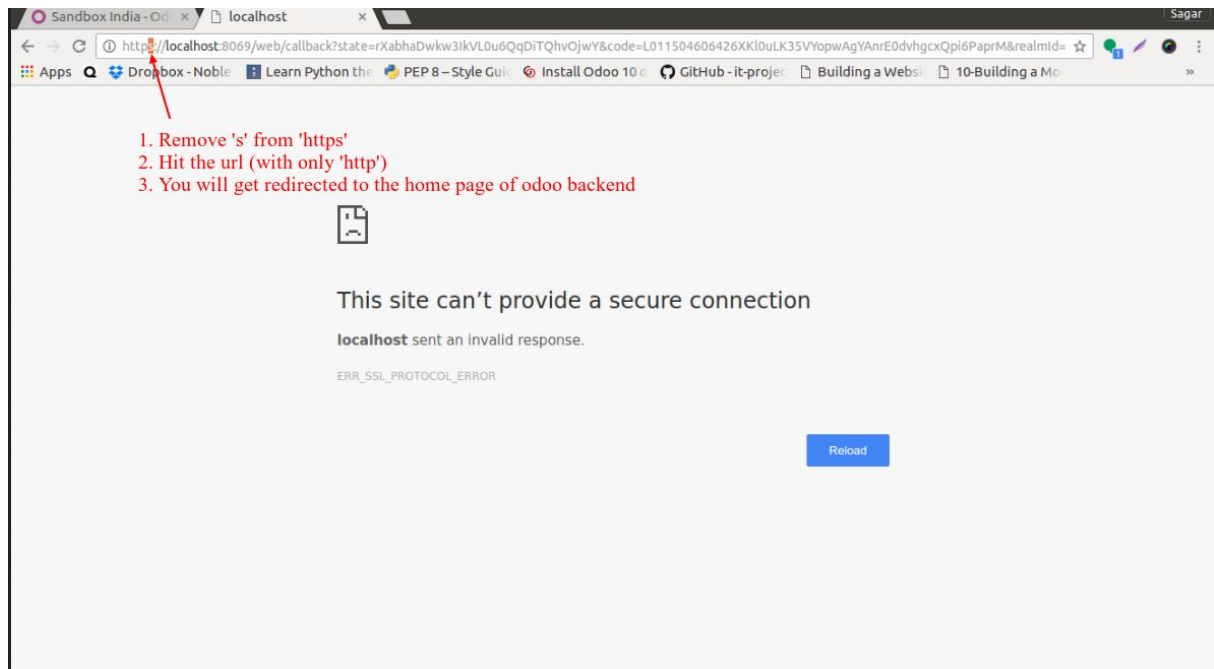

- If not logged in, it will ask to log in first. Then, available list of sandbox will get displayed. Select the particular Sandbox.

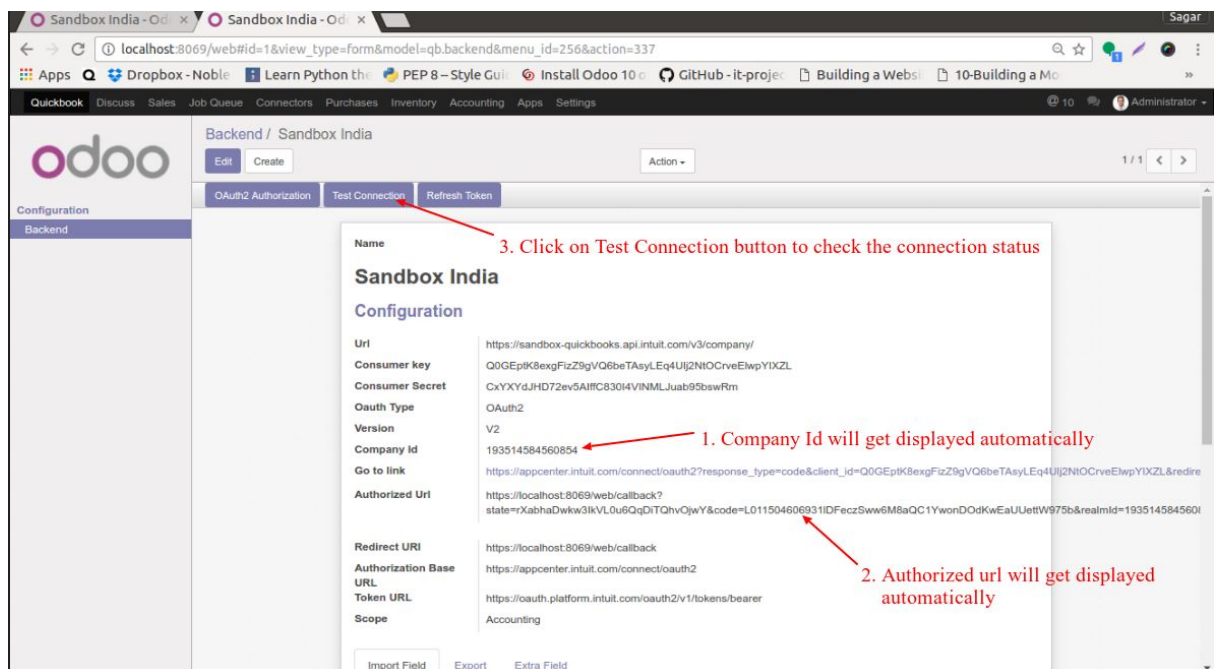

- Click on **Authorize** button. You will get redirected to new page.

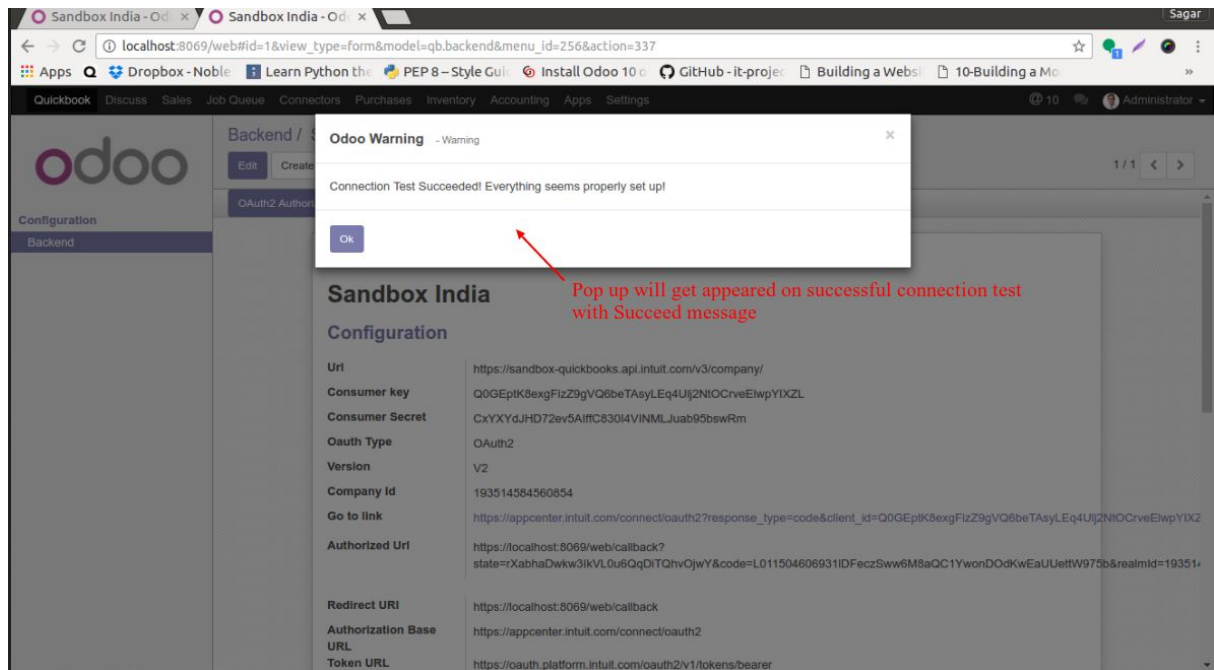

6. Remove 's' from 'https' and *hit* the URL

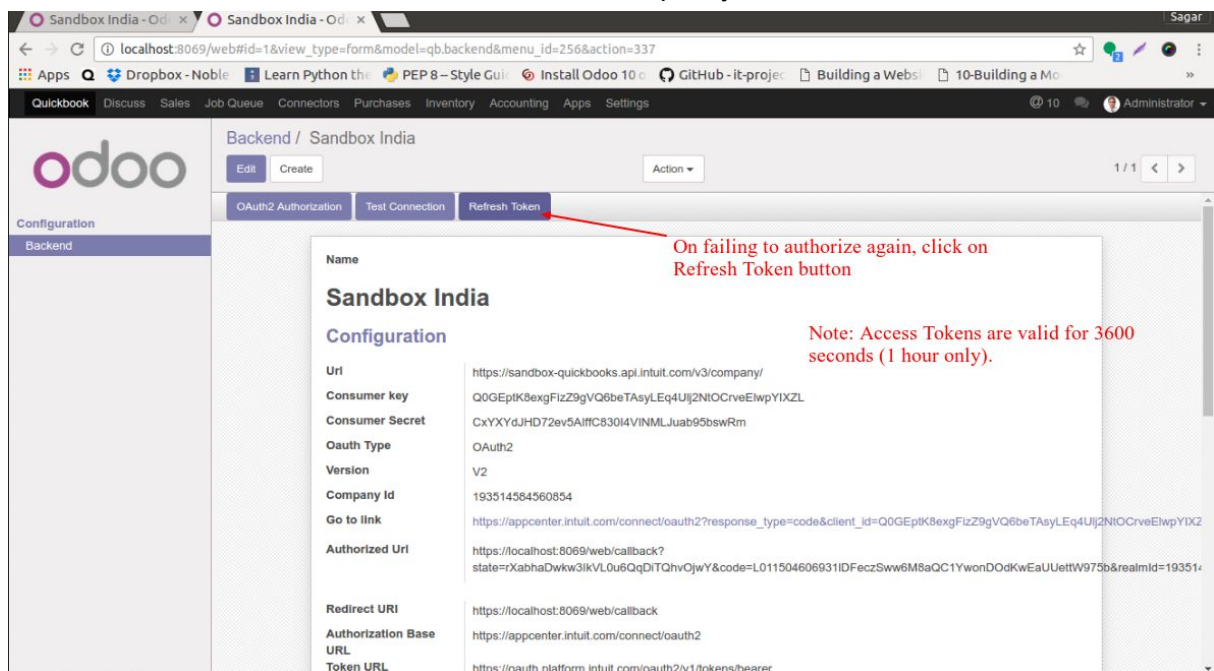

7. You will get redirected to the Home page of odoo quickbook backend. *Click the created sandbox* to check the details.

- Click on Test Connection button to check if configuration has properly set.

- Click on Refresh Token button on failing to authorize. Please refer https://developer.intuit.com/docs/0100_quickbooks_online/0100_essentials/000500_authentication_and_authorization/connect_from_within_your_app#/Discovery_document this for more information about Refresh Access Token policy.

As the access tokens are valid only for 1 hour, our Refresh Token scheduler runs in backend and it refreshes the token for every 50 minutes.
